

## INTERIM ASSESSMENT SCRIPT SUBMISSION FORM

Script marking is only available to Classroom, Live Online and Distance Learning students enrolled on appropriate Kaplan courses.

Name: .....

Address: .....

.....

.....

Kaplan Student Number: .....

Your email address:

# ACCA – Paper F2 and FMA Management Accounting December 2014 to June 2015 Interim Assessment

### Instructions

- Please complete your personal details above.
- All scripts should ideally be submitted to your Kaplan centre for marking via email to help speed up the marking process.  
Please scan this form and your answer script in a single PDF and email it to your Kaplan centre.
- Alternatively you may post your script to us. If so, please use the correct Royal Mail tariff (large letter).
- Classroom students may submit scripts to their local centre in person.  
You will be provided with the dated receipt below which you should retain as proof of submission.

Note: If you are a sponsored student, your result will form part of the report to your employer.

Office use

<b>Centre</b>		<b>Date sent to marker</b>	
<b>Date received</b>		<b>Date received from marker</b>	
<b>Marker's initials</b>		<b>Date returned to student</b>	
		<b>Student's overall mark</b>	

Receipt – only issued if script submitted by classroom student in person to Kaplan centre:

✂ -----

## Marking Report

### Notice to Markers

- 1 When commenting about the script performance, please ensure on individual questions and on overall assessment your comments cover areas of examination technique including:

<ul style="list-style-type: none"><li>• Time management</li></ul>	<ul style="list-style-type: none"><li>• Handwriting</li></ul>	<ul style="list-style-type: none"><li>• Presentation and layout</li></ul>	<ul style="list-style-type: none"><li>• Use of English</li></ul>
<ul style="list-style-type: none"><li>• Points clearly and concisely made</li></ul>	<ul style="list-style-type: none"><li>• Relevance of answers to question</li></ul>	<ul style="list-style-type: none"><li>• Coverage and depth of answer</li></ul>	<ul style="list-style-type: none"><li>• Accuracy of calculations</li></ul>
<ul style="list-style-type: none"><li>• Calculations cross-referenced to workings</li></ul>	<ul style="list-style-type: none"><li>• All parts of the requirement attempted</li></ul>	<ul style="list-style-type: none"><li>• Length of answers equates to marks available</li></ul>	<ul style="list-style-type: none"><li>• Read the question carefully</li></ul>

- 2 For each question, please provide suitable constructive comments

Question Number	General Comments	Exam Technique Comments

**ACCA INTERIM ASSESSMENT**

# **Management Accounting**

**December 2014 to June 2015**

Time allowed **2 hours**

This paper is divided into 2 sections:

Section A: All 35 questions are compulsory and **MUST** be attempted.

Section B: All **THREE** questions are compulsory and **MUST** be attempted.

**NOTE:** this assessment does not fully replicate the exam style. In the exam there will be 3 long form questions covering Budgeting, Standard costing and Performance appraisal. This assessment has 3 questions covering Budgeting.

**Formulae Sheet is on page 3**

**Do not open this paper until instructed by the supervisor**

**This question paper must not be removed from the examination hall**

## FORMULAE AND TABLES

### Regression analysis

$$y = a + bx$$

$$a = \frac{\Sigma y}{n} - \frac{b \Sigma x}{n}$$

$$b = \frac{n \Sigma xy - \Sigma x \Sigma y}{n \Sigma x^2 - (\Sigma x)^2}$$

$$r = \frac{n \Sigma xy - \Sigma x \Sigma y}{\sqrt{(n \Sigma x^2 - (\Sigma x)^2)(n \Sigma y^2 - (\Sigma y)^2)}}$$

### Economic order quantity

$$= \sqrt{\frac{2C_o D}{C_h}}$$

### Economic batch quantity

$$= \sqrt{\frac{2C_o D}{C_h \left(1 - \frac{D}{R}\right)}}$$

ACCA F2 AND FMA: MANAGEMENT ACCOUNTING

**PRESENT VALUE TABLE**

Present value of 1, i.e.  $(1 + r)^{-n}$

Where  $r$  = discount rate

$n$  = number of periods until payment

Periods (n)	Discount rate (r)									
	1%	2%	3%	4%	5%	6%	7%	8%	9%	10%
1	0.990	0.980	0.971	0.962	0.952	0.943	0.935	0.926	0.917	0.909

## SECTION A – ALL 35 QUESTIONS ARE COMPULSORY AND MUST BE ATTEMPTED

### EACH QUESTION IS WORTH 2 MARKS

**1 Company Q orders inventory items from a local supplier. The following information is also available:**

Demand	= 5,000 units per quarter
Holding cost	= \$0.192 per unit per year
Deliver cost per order	= \$30
Maximum room available for inventory	= 6,000 units

What is the most cost efficient order size?

- A 250
- B 1,250
- C 2,500
- D 6,000

**2 Which TWO of the following would usually be classified as indirect production labour costs?**

- A Sales director's salary.
- B Supervisor's salary.
- C Regular weekly overtime premium
- D Raw material purchases

**3 A sample is taken in such a way that every member of the population has an equal chance of being selected. What type of sampling is this?**

- A Stratified sampling
- B Random sampling
- C Cluster sampling
- D Quota sampling

**4 What type of graph is this?**

- A Compound bar chart
- B Simple bar chart
- C Percentage component bar chart
- D Component bar chart

**5 The following represent the materials transactions for a company for the month of July 20X7:**

	\$000
Materials purchases	150
Issued to production	126
Materials written off	8
Returned to stores	4
Returned to suppliers	3

The material inventory at 31 July 20X7 was \$26,000.

What was the opening balance on the materials inventory account at 1 July 20X7?

- A \$9,000
- B \$11,000
- C \$15,000
- D \$17,000

**6 The following details are available for a company:**

	<i>Budgeted</i>	<i>Actual</i>
Expenditure	\$176,400	\$250,400
Machine hours	4,000	5,000
Labour hours	3,600	5,400

What are the overheads if the company absorbs using labour hours?

- A under-absorbed by \$29,900
- B under-absorbed by \$14,200
- C over-absorbed by \$14,200
- D over-absorbed by \$64,990

**ACCA F2 AND FMA: MANAGEMENT ACCOUNTING**

---

**7 Who is cost accounting mainly concerned with providing information for?**

- A managers
- B inland revenue
- C customers
- D shareholders

**8 A company makes and sells one product. The price is \$50 per unit. The cost card is:**

	\$
Direct material	22.00
Direct labour	5.50
Direct expense	0.50
Overheads	15.00
<b>Total unit cost</b>	<b>43.00</b>

60% of overheads are fixed, the remainder are variable overheads. During September, 10,000 units were sold.

What was the contribution for September?

\$
----

**9 Rees Ltd operates a total absorption costing system. Budgeted fixed overheads for 20X1 were \$15,000 and budgeted production was 10,000 units.**

During 20X1, the actual fixed overheads amounted to \$12,470 and actual production was 9,400 units. What adjustment is required in respect of absorption of overheads?

- A Increase profit by \$1,630
- B Decrease profit by \$1,630
- C Increase profit by \$900
- D Decrease profit by \$900

**10 Which of the following statement is true when applied to fixed costs?**

- A Overhead costs are always fixed costs
- B As production levels increase, fixed cost per unit decreases
- C Fixed costs are always irrelevant in a decision-making situation
- D As the level of activity changes, fixed costs will also change

- 11 A company has analysed the relationship between cost and output and has obtained the following values:**

Variable cost	= 10
Sum of Y	= 20,000
Sum of X	= 500
Number of pairs of data	= 5

What is the fixed cost?

\$

- 12 The following data relates to two activity levels of an out-patients' department in a hospital:**

Number of consultations by patients	9,000	11,500
Overheads	\$169,750	\$189,125

What is the variable cost per consultation?

- A is approximately \$7.75  
 B is approximately \$16.45  
 C is approximately \$18.86  
 D cannot be calculated without more information
- 13 A process has the follow information relating to it for a particular period:**

Input units	10,000 litres
CWIP	3,000 litres
CWIP degrees of completion	
Material	100%
Conversion	60%
Material cost	\$90,000
Conversion cost	\$52,800

What is the value of the completed output (there are no losses in the process)?

\$

- 14 In December a firm recorded a profit of \$25,000 using marginal costing principles. The opening inventory in December was 20,000 units; the inventory level had increased by 10% at the end of the month. The fixed overhead absorption rate was \$0.50 per unit.**

What is the profit using absorption costing?

- A \$26,000  
 B \$25,000  
 C \$24,000  
 D \$27,000

ACCA F2 AND FMA: MANAGEMENT ACCOUNTING

---

- 15 Sam is an assembly worker earning \$12 per hour for a basic 35-hour week. Any overtime is paid at a premium of 50%.**

In the last 4-week period Sam was paid for 150 hours, during this time 15 hours were classed as idle due to a machine breaking down. Also included in the number of hours are 4 hours' overtime spent working for an urgent job at the request of the customer.

How much should be charged to the production overhead account for the 4-week period?

- A \$216
  - B \$240
  - C \$288
  - D \$360
- 

**The following information is to be used for questions 16 and 17.**

A component has a reorder quantity of 2,000 units. The demand varies between 100 units and 500 units per week. The lead time is steady at two weeks.

---

- 16 What is the reorder level to ensure that stockouts are avoided?**

- A 200 units
- B 2,000 units
- C 1,000 units
- D 1,500 units

- 17 What is the average inventory level if stockouts are to be avoided?**

- A 1,400 units
- B 1,200 units
- C 1,000 units
- D 2,000 units

- 18 The finishing department of Aquarius Ltd uses process costing for some of its products. 1,700kgs of material were input to the process at a cost of \$1,830. Two employees worked on this process. Each employee worked 40 hours per week for 4 weeks and was paid £8 per hour. Overheads are absorbed on the basis of £12 per labour hour. Aquarius Ltd expects a normal loss of 2% during this process, which it then sells for scrap at 50p per kg. 1,600kg of good output are produced.**

What is the value of the loss transferred to the statement of profit or loss (to the nearest \$)?

\$
----

**19 A company has four departments: Assembly, Finishing, Maintenance and Administration.**

Budgeted data for each department is shown below:

	<i>Assembly</i>	<i>Finishing</i>	<i>Maintenance</i>	<i>Administration</i>
Allocated overheads	\$90,000	\$100,000	\$10,000	\$10,000
Direct labour hours	5,000	6,000	Nil	Nil
Machine hours	10,000	3,000	2,000	Nil
% of time spent maintaining machinery	60	40	Nil	Nil
Number of staff	60	120	10	10

What is the most appropriate production overhead absorption rate to use in the Assembly department?

- A \$9.60 per machine hour
- B \$9.90 per machine hour
- C \$17.33 per labour hour
- D \$18.33 per labour hour

**20 You are putting together a price quote for a potential customer. To do so, you need to calculate the labour costs of the workers involved in the job. You have estimated that the job will take 210 labour hours of work. However, 20% of the total labour hours worked is always idle time.**

If the wage rate is \$7.50 per hour, what will be the total labour cost of the job?

- A \$1,575.00
- B \$1,890.00
- C \$1,968.75
- D \$2,000.50

**21 Which of the following are the basic principles of TQM?**

- (i) Get it right, first time.
  - (ii) Continuous improvement.
  - (iii) Customer focus.
- A (i), (ii) and (iii)
  - B (ii) and (iii)
  - C (i) and (ii)
  - D (iii) only

ACCA F2 AND FMA: MANAGEMENT ACCOUNTING

---

**22 The cost of a product is given by the equation  $y = 7,250 + 37x$ . What is the total cost for 250 units?**

- A \$15,275
- B \$16,500
- C \$17,500
- D \$18,275

**23 The following information is relevant for a production process for Period 5:**

Direct material cost	12,000
Direct labour cost	7,000
Overheads	5,000

The process produces joint products X and Y, which are then sold at the prices given below.

	<i>Product X</i>	<i>Product Y</i>
Units	3,000	9,000
Sales price per unit	\$7	\$5

How much cost would be incurred by Product Y if the joint costs were apportioned on market value?

- A \$7,636
- B \$8,000
- C \$16,000
- D \$16,364

**24 Which TWO of the following are characteristics of service costing?**

- A Simultaneous production and consumption of the service
- B Homogeneity
- C Perishability
- D Tangible output

**25 Information required by a business can be sourced both internally and externally. Which of the following is a benefit of internally sourced information?**

- A wide range of information available
- B information can be accessed easily
- C information may not be accurate
- D sourcing information will be time consuming

**26 What is the double entry for direct production materials returned to stores?**

- |   |                                    |                                    |
|---|------------------------------------|------------------------------------|
| A | Dr Finished goods control account  | Cr Material inventory account      |
| B | Dr Material inventory account      | Cr Work-in-progress control a/c    |
| C | Dr Production overhead control a/c | Cr Work-in-progress control a/c    |
| D | Dr Material inventory account      | Cr Production overhead control a/c |

**27 A company uses components at the rate of 300 units per month, which are bought in at a cost of \$1.12 each from the supplier. It costs \$17.50 each time to place an order, regardless of the quantity ordered. The supplier offers a 4% discount on the purchase price for order quantities of 1,000 items or more. The current EOQ is 750 units. The total holding cost is 20% per annum of the value of inventory held.**

What is the change in total cost to the company of moving to an order quantity of 1,000 units?

- A \$158 additional cost
- B \$3 additional cost
- C \$3 saving
- D \$158 saving

**28 Smith Inc operates a total absorption costing system. Budgeted fixed overheads for a period were \$375,000 and budgeted production was 15,000 units.**

During the period, the actual fixed overheads amounted to \$418,000 and actual production was 17,000 units.

How much is the under or over-absorption of overheads?

- A under-absorbed by \$43,000
- B under-absorbed by \$7,000
- C over-absorbed by \$7,000
- D over-absorbed by \$43,000

**29 A company expects a normal loss of 10% of input in a process. Information for period 8 is as follows:**

Material input 400 litres costing \$8 a litre

Conversion costs \$4,800

Output 330 litres

Losses are identified when the process is 60% complete.

There is no opening or closing work in progress.

What is the value of the completed output?

- A \$515
- B \$3,474
- C \$6,897
- D \$7,484

**30 In TQM what would inspection and testing of products be classified as?**

- A Prevention costs
- B Appraisal costs
- C Internal failure costs
- D External failure costs

**31 How many stages are there in the Product life cycle?**

- A 3
- B 4
- C 5
- D 6

**32 The following data is to be presented in a pie chart:**

Shirt sales for the London store

Red	50
Pink	45
Blue	90
Green	20
Black	100
White	200

What angle would the section be for the blue shirts?

- A 18°
- B 64°
- C 90°
- D 126°

**33 Which TWO of the following are included in the costs of holding inventory?**

- A interest on capital held in tied up inventory
- B the costs of ordering replacement inventory
- C the cost of insurance
- D emergency orders

**The following data applies to questions 34 and 35.**

A factory manufactures fizzy drinks. During October work commenced on 11,000 litres.

OWIP                      2,000 litres

Costs incurred so far

    Materials        \$3,000

    Conversion     \$583

Degrees of completion

    Materials       100%

    Conversion     50%

Completed output    9,000 litres

CWIP                    4,000 litres

Degree of completion:

    Materials       100%

    Conversion     50%

Costs incurred in Period 1:

    Materials       \$10,461

    Conversion     \$24,700

---

**34 Using the FIFO method of valuing production, how many Equivalent units are there for the Conversion costs?**

A    7,000

B    9,000

C    10,000

D    11,000

**35 Using the FIFO method of valuing production, what is the value of the completed output?**

A    \$8,744

B    \$23,947

C    \$26,417

D    \$30,000

**(70 marks)**

## SECTION B – ALL THREE QUESTIONS ARE COMPULSORY AND MUST BE ATTEMPTED

- 1 The following information has been provided to complete the cash budget for Armadillo Ltd for the three months ended 31st December.

Actual sales are:

- August \$10,000
- September \$15,000

Forecast sales are:

- October \$7,000
- November \$8,000
- December \$7,000

Based on previous experience the debt collection policy is:

- 50% of cash is received in the month of sale
- 20% one month after sale
- The remainder two months after sale

Purchases

- Credit purchases were \$8,000 in August and are forecast to increase by 2% in September and then decrease by 1.5% for the last 3 months of the year. Payments are made one month after purchase.

Expenses

- Wages are forecast to be \$2,000 each month, rent for the year is \$6,000, paid in 12 equal monthly instalments. Depreciation of planting equipment is charged at 5% reducing balance. The carrying amount from the planting equipment at the start of the year was \$10,000. The depreciation is charged quarterly, the last charge was in September.

Bank loan

- A bank loan of \$50,000 has been negotiated and this will be paid into the business bank account in October. The principal element of the bank loan is to be repaid in 20 equal monthly instalments beginning in November. Interest is to be paid monthly at a rate of 8.4% per annum on the principal amount starting in October.

**Required (round to the nearest whole \$):**

- |  |                  |
|--|------------------|
| <b>(a) Calculate the cash receipts for December</b>                    | <b>(3 marks)</b> |
| <b>(b) Calculate the cash payments for December</b>                    | <b>(2 marks)</b> |
| <b>(c) Calculate the cash payments for other expenses for December</b> | <b>(3 marks)</b> |
| <b>(d) Calculate the cash repayments for the loan for December</b>     | <b>(2 marks)</b> |

**(Total: 10 marks)**

2 Wellyboot Manufacturing has two main products 'Blue boot' and 'Red boot'.

Both products use the same common material and labour but in differing proportions.

The annual budget is broken down into four separate 13 week periods. The following information relates to the 13 week period ended 31 March 20X3.

**Marketing and production data**

	'BB'	'RB'
Budgeted sales (volume in units)	850	1,250
Material content per unit (litres)	7	8
Direct labour (standard hours per unit)	10	6

**Production labour**

The 30 production workers work a 37 hour, five day week and are paid \$8 per hour. Any hours in excess of this are paid by the company at a premium of 25%.

**Purchasing and inventory**

It is estimated that the raw material cost will be \$12 per litre over the budget period.

Inventory levels at the start of the budget period are planned as:

	<i>Finished goods</i>	
Raw materials	'BB'	'RB'
2,400 litres	165	365

At the end of the period, inventory levels are planned as:

- Raw materials to cover 14 days production.
- Finished goods of 'BB' should be 7 days sales volume.
- Finished goods of 'RB' should be 14 days sales volume.
- Assume a five day week for both sales and production.

**Required:**

**Calculate (round your workings and answers to the nearest whole number):**

- (a) **Production budgets in units for 'Blue boot' and 'Red boot' products (3 marks)**
- (b) **Raw materials purchases budget in litres (3 marks)**
- (c) **Raw materials purchases budget (cost in \$) (1 marks)**
- (d) **Production labour budget in hours (2 marks)**
- (e) **Production labour budget (cost in \$) (1 marks)**

**(Total: 10 marks)**

**ACCA F2 AND FMA: MANAGEMENT ACCOUNTING**

---

- 3** Bay Cleaning Ltd produce a standard industrial cleaning material which is sold in 5 litre drums. Bay's managing director has provided the operating statement for the last 12 months together with the original budget.

**Bay Cleaning Ltd operating statement – year ended 31 December 20X3**

	<i>Budget</i>	<i>Actual</i>
Production and sales volume (drums)	100,000	120,000
	\$	\$
Sales	500,000	630,000
Variable costs:		
Materials	210,000	264,000
Labour	75,000	94,000
Semi-variable costs:		
Power	70,000	83,500
Water	15,000	17,500
Other overheads	12,000	12,500
Fixed costs:		
Production	35,000	40,000
Administration	27,500	30,000
Selling and distribution	30,000	31,000
Operating profit	25,500	57,500

Additional information:

- The budgeted fixed element of power was \$10,000.
- The budgeted fixed element of water was \$5,000.
- The budgeted fixed element of other overheads was \$10,000.
- All other costs are either fixed or vary in direct proportion with the level of activity.
- There was no opening or closing inventory of finished goods.

Complete the table to show Bay's actual results for the period compared with the flexible budgetary allowance for the actual level of activity and detail all the relevant variances.

(½ mark for each correct cell)

	<i>Actual</i>	<i>Flexed budget</i>	<i>Variance F/A</i>
Production and sales volume (drums)	120,000	120,000	
	\$	\$	\$
Sales	630,000		
<b>Variable costs</b>			
Materials	264,000		
Labour	94,000		
<b>Semi-variable costs</b>
