

CIMA F3 Key Examinable Areas for November 2011

NOTE: These should only be used in conjunction with proper studying. We cannot guarantee that these topics will appear in the actual exam as we have not seen the exam papers. Examiners are not predictable so it is vital that all core syllabus areas are revised fully. The tips are based on Kaplan's experience and understanding of the CIMA exams and will help focus your last minute revision.

Please also read all the Examiner's Articles – available on the CIMA Global website

Section A

This generally focuses on topics from syllabus section C:

'Investment Decisions and Project Control' (this accounts for 45% of the syllabus)

Investment Appraisal or Business Valuation could be the main topic.

Although the examiner has said that Section A will not always focus on this area, the last time Business Valuation appeared in detail in Section A was four sittings ago, so its a key topic this time.

Section B

This will contain three questions. Key topic areas which may be tested this sitting are:

- working capital management / ratio analysis
- cost of capital
- the role of treasury
- the link between financing, dividends and investment policies
